Accessing Drip Marketing in Swiftpage for SalesLogix

This Quick Start Guide takes you through the steps of accessing your Drip Marketing Campaigns in Swiftpage for SalesLogix and managing your contacts in those Campaigns.

Click on the Swiftpage E in SalesLogix and then click on the Drip Marketing tab. The following screen will appear:

Messages No new messages						Info Account: SageSummitDemo User: idoescher

C Selected Contacts of C Lead group: All L C Selected Leads or cu	eads urrent Lead (fro	n active view	•	Y		Add T	argets	

Your Drip Marketing Campaigns will appear on this screen and you can use the radio buttons to determine which Campaigns are shown. The information displayed for each Campaign includes status (Active, No Targets or Build), the number of targets in the Campaign, whose behalf the

Campaign is being sent on (if not the original user), and information about syncing, next stages, new history and new scores. From here, you can perform several functions:

- 1. The View and Manage buttons will take you to the online Drip Marketing Campaign Manager, where you can view and edit your Campaigns.
- 2. Sync Targets in Drip Campaign: click this button to sync your SalesLogix contacts with your existing Drip Marketing contacts. Performing this function ensures that your Drip Marketing Campaign always has the most current contact information from your SalesLogix database.
- 3. Get Stage Results: if the New History or New Scores column for your Drip Marketing Campaign indicates that there is information to be written back to your SalesLogix database, click the Get Stage Results button to write the information back to SalesLogix.
- 4. Clear Sync Status: if the Sync or Sync By column for your Drip Marketing Campaign indicates that a sync needs to be performed, you can clear that sync by clicking the Clear Sync Status button.
- 5. In the "Modify Drip Campaign targets" section, choose the contacts you want to add to or remove from your Drip Marketing Campaign (the options for contacts are similar to the options when sending an email through Swiftpage for SalesLogix: contacts, leads, campaigns and groups). Select the contacts you want to add or remove, then click the appropriate button (Add Targets or Remove Targets). A confirmation screen will appear:

Update Drip	Campaign list	×
Campaign:	Test Duration Campaign #1	
Targets:	1	
When:	10/5/2009 3:22:08 PM (Now)	
SPE Account:	SageSummitDemo	
SPE UserID:	idoescher	
Step 1 of 3: (Complete. Add Targets to Drip Marketing campaign ?	
	Yes View Targets Cancel	

Click Yes to confirm the targets or View Targets to see the list of targets about to be added.

6. Group Sync Targets: click this button to sync an entire SalesLogix group to your Drip Marketing contact list. When you click this button, the following screen will appear:

Note* Unly the first 10 targets a	are shown in each Sync category. "D) o Not Solicit' targets ignored
Matched	Missing	New
Doescher, Ian		
otal: 1	Total: 0	Total: 0
elect Sync options:		
Matched	Missing	New
 Update (all data fields) 	Remove	C Add
C Remove	C lanore	C Ignore
T	T	
Targets that are in both the selected SLX group and the	Targests that are in the Drip marketing campaign list, but not	Targets that are in the selected SLX group, but not in the
Drip marketing campaign list	in selected SLX group	Drip marketing campaign list

This screen shows you which contacts from the SalesLogix group match up with your Drip Marketing contact list, which are missing from your SalesLogix database and which are new to be imported to the Drip Marketing contact list. You can choose to update or remove all contacts that match, remove or ignore any missing contacts, or add or ignore any new contacts. Then click the Apply changes button.
